

Class Survey

The following survey is being administered to students in introductory statistics courses at several campuses across the state. The aim is to create a large, entertaining dataset that students can analyze later in the semester/quarter as well as in future years. As such, this dataset will be made publicly available.

The questions are designed to avoid sensitive topics, but nonetheless if there is a question that you prefer not to answer, you can select "prefer not to answer" if that option exists, or you can simply make up an answer.

If you would like to proceed, click "Next" below. Many thanks for contributing to this dataset!
